Bridge and Highway Fabricated

Your Strongest Partner for
Expansion Joint Systems

What we bring to your project

Dedication, quality, and world-class results—on time and on budget.

World-class
expansion
joint
systems for
world-class
projects

Full project support

As your strongest partner, not only will Watson Bowman Acme provide you with customized expansion joint system solutions, we will also support your business throughout each phase of your project.

Research and Development

Resources bring top innovation into the bridge market.

Lead Generation

Local sales support backed by corporate research teams to find the best-fit projects.

Estimating

Commitment to fast and accurate project quotations and takeoffs.

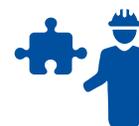

Engineering Support

Customized concepts, designs, and drawings for project-based solutions.

Order Management

Delivery/freight options that fit your specific business needs.

Technical Services

Field training and on-site technical assistance readily available.

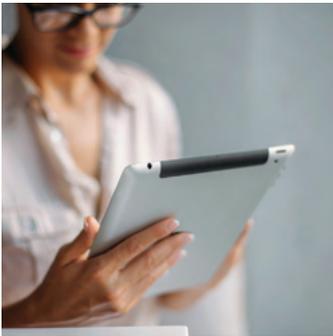

Being the industry leader means something

Commitment to quality, to service, and reliability. It's about committing to innovation, setting the industry standard, and providing you with world-class solutions.

Technical Expertise

We hire the best talent in the industry to bring real solutions for your specific needs and challenges. No project or unique design requirement is too difficult for the Watson Bowman Acme team of experts.

Innovation

Watson Bowman Acme has designed and manufactured systems for the world's most complex projects. With access to state-of-the-art research and development resources, innovation continues to be critical to our success. And yours.

Custom Solutions

It's more than just technical expertise. From custom designs, to full systems created specifically for your project, we are constantly collaborating across our entire team to deliver the most effective results at minimal costs.

Quality

You can't have quality without commitment to continuous improvement. Combined with a dedication to providing only the highest quality products and services, a recent \$2 million+ investment in process and equipment improvements, an ISO 9001:2008 certification, all supported by Lean Six Sigma tools and methodology, we keep manufacturing lean and get you top results—on time and on budget.

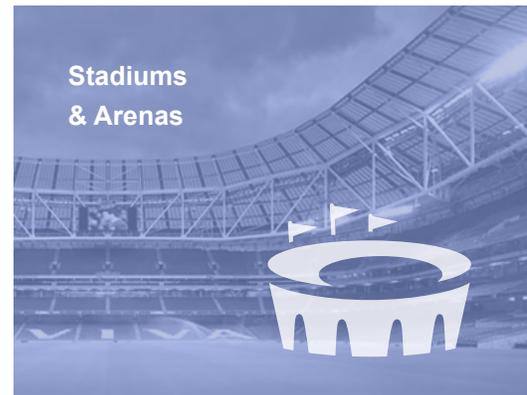

Our proven systems facilitate engineered structural movement capabilities and protect bridges against the deteriorative effects of climactic conditions. Precision machine manufacturing of steel shapes combined with extruded neoprene seals satisfy both movement flexibility and waterproofing protection for bridge structures.

Partnership, support, and deep expertise

Watson Bowman Acme is at the industry forefront of the preservation and maintenance of expansion joint systems.

Watson Bowman Acme provides technical support and product solutions for the most complex and challenging applications, with deep expertise across all industries.

Watson Bowman Acme provides technical support and engineered product solutions for the most complex and challenging applications.

WBA has a strong track record in supplying best-in-class products and services to satisfy unique demands of Infrastructure Design-Build projects. Utilizing knowledge gained as a leader in expansion joint system research and testing, WBA can design project-specific solutions to fit virtually any design requirements.

Watson Bowman Acme Expansion Joint Solutions for bridges and highways

Armored Technology:

Wabo®Modular
Engineered for toughest conditions

Wabo®X-Cel Modular
Designed for multi-directional movement

Wabo®StripSeal
Cast-in-place watertight system

Wabo®Crete StripSeal
Restructure failed joint headers

Wabo®FingerPlus Joint System
Heavy duty Interlocking system

Joint Seal Technology:

Wabo®Compression Seal
High abrasion and UV resistance

Wabo®Evazote
Closed cell, UV stable seal

Wabo®InverSeal
Cast-in-place watertight system

Wabo®HSeal
Silicone coated foam

Wabo®SPS
Watertight silicone profile

Header and Spall Repair:

Wabo®Crete II
High impact absorption
